

The idea that all major climate changes are marked by a time range of thousands of years is evaporating. This web site is designed with dual purposes in mind about the weather and climate. History is one aspect.

Do not be deceived for there are many falsities on the internet without any historical foundation espousing the belief TRV is a crock. The secrets and descriptions of Technical Remote-Viewing was a military program that was so super top-secret within the United States Army, it only became public in 1995.

Many years ago, I wrote a volume about World War II history entitled A Toast For You and Me, America's Participation, Sacrifice, and Victory, and asked what does WW II mean to you? Alert: For The Times is not a book about world war but, along a similar vein of thought I ask you, what does the recent climate ramifications mean to you?

So as people argue the merits and truth of the term global warming, our weather has indeed become challenging. (The climate has the potential to become unstable; events like tidal waves, heat waves, gigantic , turbulence winds are but a microcosm of the story. Some of you are acquainted with a secret \$100,000 Pentagon report finalized in October of 2003, and some of you are not. This strange 22-page report begins with: the purpose of this report is to imagine the unthinkable. Whether you like it or not, whether you have a seared conscience to global warming or not, the urgent rise of global temperatures is not make-believe.
